

## EXPLANATION OF COMMISSION DETERMINATIONS ON ADEQUACY

in

*Carbon Steel Wire Rod from Argentina,*  
Inv. Nos. 701-TA-A and 731-TA-157 (Review)

On February 4, 1999, the Commission determined that it should proceed to full reviews in the subject five-year reviews pursuant to section 751(c)(5) of the Act. Regarding domestic interested parties, the Commission received responses from nine domestic producers accounting for nearly 98 percent of U.S. production of carbon steel wire rod. Regarding respondent interested parties, the Commission received a response from an Argentine producer that accounts for all subject imports. Accordingly, the Commission determined that both domestic and respondent interested party group responses were adequate and that it should proceed to full reviews.
